EBOLA AND WORK-RELATED TRAVEL INFORMATION VIDEO

Following our collaboration with International SOS on the OSH guidance material "Global Framework: safety, health and security for work-related international travel and assignments", we are pleased to share International SOS' information video on Ebola and work-related travel.

The WHO is reported to have logged close to 9'000 cases of Ebola with almost half of them being fatalities. The video is particularly informative for those considering work-related travel to affected regions and provides useful points to bear in mind on how to prevent contracting the virus.

The video can be viewed by clicking on the link in the side panel and has been produced by International SOS.

For more information please visit the Occupational Health and Safety page on the IOE website.
